

RU 2020 GRG Student's Profile

Furaha Mpuranyi Julie

University: Universite Evangelique en Afrique, DRC

Program: M.Sc. in Biostatistics (Biomathematics and applied statistics)

GRG Project: Improving animal productivity by developing local food resources in South Kivu, east of the Democratic Republic of Congo.

Research Focus: Spatial-temporal modelling of the vegetation cover dynamics in pastures in South-Kivu/DRC.

About me: My interests lie in programming languages and artificial intelligence, modelling infectious diseases, species distribution, and habitat suitability. I have experience in using statistical software, particularly R and Python, in analysing a wide range of data, particularly data related to health and agronomy. I improved my scientific research, communication, and interpersonal relationship skills during my studies. Besides my research interests, I am involved in youth leadership development and trying to be a positive influence on the youth. I am also into entrepreneurship, and I am passionate about God.

My favourite quote: "God is forever, always and more than Enough" - *Unknown*
